BODY TO BE TAKEN TO JUAREZ

Was Located by Colonel Carranza, a Nephew of the Head of the De Facto Government, On a Ranch In Chihuahua - Remains Positively Identified On Being Exhumed-Last Hours of the Bandit Leader and Border Comment.

El Paso, Tex., April 17.-Villa is dead, according to official reports received here from Mexico.

The outlaw's body was taken out of its lonely grave, near Cusihuirachio. Chihuahua, and positively identified by Mexicans. The bandit died from gangrene as a result of a wound in his left knee.

If the death of Villa, generally credited on the border, is true, the United States army will immediately be withdrawn from Mexico, the object of its entry having been accomplished.

The story of the finding of the body came from several sources. First, Carranza officials received messages from San Antonio and Madera, both in the state of Chihuahua. Later a private message from San Antonio, Chihuahua confirmed the finding of the body and gave the details. Tais message said that a former Villa colonel, captured by General Cavzos, a Carranza commander, offered, if his life was spared, to show where Villa was buried. The offer was accepted and he led a command under Colonel Carlos Carranza, nephew of the first chief of the Constitutionalists, to the henely grave of the former Mexican

Consul Letcher at Chihuahua should be

Customs Collector Cobb at El Paso informed the state department that Mexican customs officials at Juarez had told him the body of the bandit had been found and would be taken to Chihuahua City.

The Mexican embassy received this message from Mexican Consul Garcia at El Paso: "The telegraph operators at Cusihuriachio and Madera have informed me that they have found the lody of Francisco Villa and that it will be conducted to Chihuahua."

Brown and his black troopers of the Tenta United States cavalry had an engagement of some character Thursday evening at a point north of Parral in which city they fought with the civilian populace on Tuesday last. The colonel sent a message from a roint north of Parral to American Consul Letcher in Chihuahua, asking that an aeroplane be sent him that he might report.

Colonel Brown did not state the nature of his trouble, but it is feared that he had a clash with Carranza forces. Since it was Colonel Brown's force that was in Parral Wednesday had retired north when his route was ance of the city generally. supposed to be south. Either he ran out of food and had to return north. or was forced to retire in face of superior numbers, army men were in clined to believe.

Twenty bandits attacked the Unit miles north of Satevo, but were repulsed. One of the bandits was killed and several wounded. None of the Americans were injured. General Pershing was personally with the train when attacked.

Rioting took place in the City of Chihuahua, according to reports reresult of the rioting.

he Coming of Peace

Just when the European war will end is a matter of boubt. No one, of course, knows when the end will come. lany people confidently believe that the end is near at hand and just as many believe that the reign of turmoil, death and destruction in Europe will continue for a long time yet.

The only thing that is certain—the only thing we all Mow—is that the end is bound to come sometime.

Another thing everyone knows, and knows positively, is hat when the end of the great conflict does come it is cerain to necessitate a sweeping and complete readjustment of mancial and business affairs in this country. That means, ithout doubt, that a period of depression will endure while he readjustment process is going on.

We cannot fail to remember the period of depression thich followed the outbreak of the war. The world's busiless was deranged and our commerce both foreign and domes te was compelled to undergo a complete change.

The business of the United States today, immense in volone as it is, is based on war conditions, war prices and im-Mense volume of money which the nations of Europe have been compelled to spend here for war materials and the necessaries of life.

It follows, therefore, that the people of the United States Doying to the fullest extent the abundance of prosperity, should not be unmindful of the coming of that time of read-Distinent and depression and now, while it is possible to do so, arrange their business affairs so that the shock, when it comes, can be sustained.

Business conditions in the United States will not be permmently injured by the restoration of peace in Europe, but they are certain to be halted pending a rearrangement of the lines of activity to meet the changed demands.

The Messages of Eastertide

The angel gave assurance to the disciples at the empty tomb. So will there be sounded the word of consolation to all who are bereaved. Men are coming to realize the fact that death is an incident rather than a conclusion in the careers of men. It is the turning point of the material in its conflict with the spiritual. The science of life is now coming to be rechoned the science of everlasting life, and sin and death are receiving the rebuke of holfness and life. The last the terrors. At the central point of the procession walked the bishop under a purple canopy, richly bossed with gold, surrounded by his clergy in all their splendor. The priests were followed by the "epitaphion," or the sepulcher of Jesus Christ. Half a dozen of the prominent citizens carried a bler covered with a black pall and decorated with myrtle, red roses, white orange blossoms, illies and other flowers in vivacious colors and containing a life size wooden statue of Christ painted in colors after the traditional Byzantine style. It was illuminated by the

The caterpillar had to die that the butterfly could be born. Death had to apparently triumph for a little while that the ultimate and far greater triumph of life and evolution might be the more complete.

And here we have in a humble but none the less effective phase the story of the resurrection, the passing of life into death, that it may emerge the greater and more perfect life.

England's Greatest Mine Fire.

The most serious colliery fire ever known in Britain was undoubtedly that which broke out in the Tawd valley mine, near Preston, in 1872. Thousands of pounds were spent in trying to get the flames under control, but they overcame everything and consumed some millions of tons of coal. A wall ten feet in thickness was built round the affected parts, but the heat cracked the masonry and brought it down as fast as it was rebuilt. However, in 1897 the river Tawd overflowed its banks and went pouring down into the mine. No fire could withstand such an immease volume of water hurled upon it, and although the flames extended for 500 yards, they were quenched after having raged for a quarter of a century .- London Tit-Bits.

From earliest childhood Tolstoy was remarkably observant of the things that were going on in the world around him. Thus, while still in his teens, we find him taking an interest in the ars of flying that was too practical to suit his devoted mother. With characteristic thoroughness he invented a design of his own and with equalty characteristic courage proceeded to put it to an immediate test from a second story window. But the boy who was afterward to find food for thought for the whole civilized world was not destined to make his mark as an infant aeroplanist. He fell instantly to the ground, and, though by great good fortune no bones were actually broken, the concussion was so great that young Tolstoy afterward slept for sixteen hours

No attempt has been made at an advance by the German infantry, but the German heavy artillery directed a heavy bomtardment against the Bois d'Avocour! and Hill 304, against which the Germans have directed much of their energy recently.

In no previous battles have the lesses been so high as these which ground Verdun, These estimates, nowhas announced its own casualties. The picket. French war office has declared the Germans have lost 200,000 in killed, wounded and captured. The Germans state semi-officially that the French casualties number 150,000 killed and wounded and that 36,000 unwounded French prisoners have been taken. !! these estimates are approximately correct, nearly 400,000 men have been eliminated as fighting units.

The ground occupiel by the Ger mans after fifty-six days of fighting may be roughly calculated as 100 square miles. They have forced back the French from their outlying position to their definite line of resistance along the semi-circle front from the edge of the Argonne eastward across the Meuse and southward into the Woevre. For the most part this main line has withstood the shock of sucressive attacks.

Washington, April 17.—Germany is ready to make counter proposals or discuss a compromise on the submarine issue, but will not accede unconditionally to any American demand implying radical modification of her methods of submarine warfare. This in a nutshell represents the present attitude of the German government, as Ambassador Gerard at Berlin un derstands it. The situation here remains unchanged.

President Wilson is understood to have approved the new submarine en as chairman. An active campaign note prepared by the secretary of will be waged for the repeal of that state, and both Senator Stone and Chairman Flood expect to be summoned to the White House to discuss the German situation.

> The president remained indoors all morning, going over the data which will form his indictment of Germany's whole program of submarine warfare. Count Von Bernstorff, the German ambassador, shows no outward concern over the situation. He is waiting calmly until the president makes his next move. Despite reports that an accounting with Germany without further delay, the ambassador is reluctant to believe that Germany's viewpoint on the whole issue will not be favorably considered by this

Passengers on New York Central Train Shaken Up.

Cleveland, April 17.-Passengers on the Twentieth Century limited, the New York Central's pride, were in danger for the second time in less than three weeks when the train, eastbound from Chicago to New York. crashed into two oil tank cars Sunday night near the drawbridge at the Cuyanoga river, and about a half mile west of the Union station. The entire length of the passenger train was sidewiped and the plates were wrenched off the side of the cars. The train came to a very sudden stop with a jolt. The passengers were thrown about and some of them were more or less cut and bruised.

The crash of the collision was heard for many blocks around the vicinity of the wreck and the report rapidly spread that many people had teen killed or badly injured. A switchrian furned in the alarm and a wrecking crew was dispatched to the scene The oil cars had been switched over into a siding and had rolled down a grade to the main or passenger track. There was a bad gash torn the entire length of all the Pullman cars according to the chief train dispatcher.

New York, April 17 .- A "toird party" movement, predicated on two principles, progressive and anti-militarism, with Henry Ford, Frank Walsh, chairman of the industrial relations commission, and Herbert Bigelow of Ohio as its presidential possibilities. has already made great strides in the middle west, according to Rabbi Stephen S. Wise. who returned from a tour of the leading cities in that part of the country making speeches against preparedness. The movement will probably reach the crystallization stage in the course of the next few weeks, but Dr. Wise would not enter into a discussion of details or personalities in connection with it.

London, April 17.-British troops soing to the relief of Kut-el-Amara have gained further ground against the Turks, who are barring their way along the Tigris river. Pushing steadily ahead, the British have driven in the Turks from their advanced lines on the right bank of the river and occupied the lines, killing many of the Turks and taking a considerable fumber of prisoners.

London, Auril 17 .- Starting out from a British naval base "somewhere in the Aegean." three British naval peroplanes flew to Constantinople last Friday, bombarded a powder factory and aeroplane hangers in the Turkish capital. Despite wind, rain and taunderstorms, all three returned safely having achieved the greatest aerial feat of the war, so far as distance is concerned. The flight to Constantinople and back covered a distance of more than 300 miles. At the same time another British seaplane flew to Adrianople, where bombs were dropred on the railway station. This machine, too, returned unharmed.

Milwaukee, April 17.-George W. Peck, soldier, author and former governor of this state, famed for his "Peck's Bad Boy" and similar humorous stories, died after a six months' illness, which at no time was supposed to be dangerous. OLD MAN GREAT HUNTER.

Whisner, at Eighty, Has Killed 330 Deer and 500 Coons. Berkeley Springs, W. Va.-Peter V.

B. Whisner, who is eighty years old, is the champion hunter of West Virginia. During a period covering fifty years he has killed 330 deer, about 500 coons and 500 turkeys, besides many foxes, squirrels and other game. Of the 330 deer fifty were bucks having horns with from three to five prongs. Two of the deer were white, rare specimens, and one black. The greatest number

he killed in one season was thirty-five. Practically all his hunting was done with a muzzle loading rifle. He said if he had had a rifle like those in use now he could have killed several hundred more deer. He says he has seen fourteen deer in one drove, one of which had white legs, the white extending up

FLOWERS OF THE PASSION.

Some Legends of Plants Connected With the Story of Easter.

Some of the early Italian painters have in the foreground of their crucifixion scenes the white wood-sorrel, purple stained, which is said to have grown at the foot of the cross and to have been colored from the blood which dropped upon it. The fact, as Ruskin points out, that the leaf of this plant possessed the power of quenching thirst may have been another reason for its introduction into the pictures.

One species of the orchid, which in England is called Gethsemane and whose petals are marked with dark stains; the passion flower, symbolical of the crown, the scourge, the spear and the nails: the arum. tiger lily and

scarret anemohe-an, it was believed, were mute witnesses of the crucifixion. And the white lily, emblem of purity, has always been connected with the stories of the Virgin and of Christ.

In Palestine there grows a creeping plant with long, hard thorns-the Spina christi-which may have furnished material for the crown of thorns placed on the Saviour's head. One of the legends says that the willow was used for this purpose and that in sorrow for its fate fts leaves droop and it weeps.

Hot Cross Buns.

England, as is well known, is famous for its hot cross buns at Easter time They are baked early in the morning of Good Friday and are eaten for breakfast. They are well nigh universal throughout the country, although the cross apon them differs in various localities. In some piaces it seems to be formed by simply drawing a knife across the top of the bun.

Immortality.

It is a thing to be thankful for that twentieth century thinking and twentieth century science are confirming. cumulatively, the dictum of Christian authority that the soul of man is immortal. To assert nowadays that the universe is the outcome of chance is to array oneself against the world's best thought. To affirm that the universe is reasonable means, in the last analysis, "that the world acts as it might be expected to act had it been thought through by mind."-George Wharton Pepper.

SYNOPSIS.

Little Helen Holmes, daughter of General Holmes, railroad man, is rescued from imminent danger on a scenic railroad by George Storm, a newsboy. Grown to young womanhood, Helen saves Storm, now a fireman, her father, and his friends, Amos Rhinelander, financier, and Robert Seagrue, promoter, from a threatened collision. Safebreakers employed by Seagrue steal General Holmes' survey plans of the cut off line for the Tidewater, fatally wound the general and escape. Her father's estate badly involved by his death, Helen goes to work on the Tidewater, Helen recovers the survey plans from Seagrue, and though they are taken from her, finds an accidentally made proof of the survey blueprint. Storm is employed by Rhinelander. Spike, befriended by Helen, in turn saves her and the right-of-way contracts when Seagrue kidnaps her. Helen and Storm win for Rhinelander a race against Seagrue for right-of-way. Helen, Storm and Rhinelander rescue Spike from Seagrue's men. Spike steals records to protect Rhinelander and Storm and Helen saves Spike from death in the burning of the courthouse.

But standing in the room which had just been the scene of his last defeat. Seagrue felt that he could at least enjoy revenge. Outlaw Leader Reported a Victim of Gangrene.

BODY TO BE TAKEN TO JUAREZ

Was Located by Colonel Carranza, a Nephew of the Head of the De Facto Government, On a Ranch In Chihuahua - Remains Positively Identified On Being Exhumed-Last Hours of the Bandit Leader and Border Comment.

El Paso, Tex., April 17.-Villa is dead, according to official reports received here from Mexico.

The outlaw's body was taken out of its lonely grave, near Cusihuirachio. Chihuahua, and positively identified by Mexicans. The bandit died from gangrene as a result of a wound in his left knee.

If the death of Villa, generally credited on the border, is true, the United States army will immediately be withdrawn from Mexico, the object of its entry having been accomplished.

The story of the finding of the body came from several sources. First, Carranza officials received messages from San Antonio and Madera, both in the state of Chihuahua. Later a private message from San Antonio, Chihuahua confirmed the finding of the body and gave the details. This message said that a former Villa colonel, captured by General Cavzos, a Carranza commander, offered, if his life was spared, to show where Villa was buried. The offer was accepted and he led a command under Colonel Carlos Carranza, nephew of the first chief of the Constitutionalists, to the lenely grave of the former Mexican

The message said the body was postively identified on being taken up, and that an examination showed that death had resulted from gangrene, as Satevo gives more complete details a result of a gunshot wound in the of the battle at Parral, where the left knee. It is certain, however, that every effort will be made to obtain so complete an identification as to make sure beyond reasonable doubt that the man who waged war with a few hundred bandits against the United States and the de facto government of Mexico simultaneously had paid the penalty. Consul Letcher at Chihuahua should be able to make the identification.

> Customs Collector Cobb at El Paso informed the state department that Mexican customs officials at Juarez had told him the body of the bandit had been found and would be taken to Chihuahua City.

> The Mexican embassy received this message from Mexican Consul Garcia at El Paso: "The telegraph operators at Cusihuriachio and Madera have informed me that they have found the logy of Francisco Villa and that it will be conducted to Chihuahua.'

Brown and his black troopers of the Tenta United States cavalry had an engagement of some character Thursday evening at a point north of Parral in which city they fought with the civilian populace on Tuesday last. Just when the European war will end is a matter of bubt. No one, of course, knows when the end will come. Many people confidently believe that the end is near at hand and just as many believe that the reign of turmoil, death and estruction in Europe will continue for a long time yet.

The only thing that is certain—the only thing we all snow—is that the end is bound to come sometime.

Another thing everyone knows, and knows positively, is that when the end of the great conflict does come it is cerain to necessitate a sweeping and complete readjustment of mancial and business affairs in this country. That means, without doubt, that a period of depression will endure while he readjustment process is going on.

We cannot fail to remember the period of depression which followed the outbreak of the war. The world's busiless was deranged and our commerce both foreign and domes to was compelled to undergo a complete change.

Ne'er a flower, or bird to sing-Nature wakes, and, lo, 'tis spring! And the church bells sweetly chime, Welcoming the Easter time.

Tiny shoots of green appear-Fragile children, pale with fear, Needing all the love and care Of the warm sun shining there. And the church bells sweetly chime, Welcoming the Easter time.

Pussy willows show their fur. You can almost hear them purr Out their welcome to the spring, Joining with the birds that sing. And the church bells sweetly chime, Welcoming the Easter time.

Oh, the smell of warm, moist earth! Oh, the magic of the birth Of the tiny ferns and flowers Soon to glorify the hours! And that mystery sublime That the bells so sweetly chime! -Martha Coleman Sherman.

At the central point of the procession walked the bishop under a purple canopy, richly bossed with gold, surrounded by his clergy in all their splendor. The priests were followed by the "epitaphion," or the sepulcher of Jesus Christ. Half a dozen of the prominent citizens carried a bier covered with a black pall and decorated with myrtle, red roses, white orange blossoms, lilles and other flowers in vivacious colors and containing a life size wooden statue of Christ painted in colors after the traditional Byzantine style. It was illuminated by the light of many thick wax candles and pitch torches carried in the procession. STORE OR STAGE?

A Word to Ambitious Young People Seeking a Future.

There is just as much demand among movie producers for actors. Merchants want to employ ambitious young men and women who can raise themselves above the ranks of the ordinary. The work is no harder, hours no longer and pay quite as good in the stores for help of all classes as it is in film or stage productions.

The "stars" in business are just as vell paid es whose names grace the billboard. Where there is one film favorite who is paid \$1,000 a month there are half a dozen mercantile managers who receive as much or more. There are hundreds who receive \$200 a month to where there are five movie actors who receive the same. And there are ten dollar a week scenes, as there are ten dollar a week jobs among the "mobs" in the stores. from the chorus or the "supes" to a place as an understudy or star, while in business many are promoted from the ranks to positions of trust and good

There are better opportunities for ambitious people in mercantile fields than as actors. The demand is many times greater. Owners are always on Sidney Katz, representing Katz and the watch for some one who will justify a promotion. But positions cannot be had without effort. They must be won by hard work, study and an overwhelming desire to get ahead. At all events we say, Stick to the store .--Farm Machinery.

Great Battle For the Possession of Verdun Enters Upon Its Ninth Week-Nearly 400,000 Men Already Eliminated as Fighting Units. Turks Admit Torpedoing Russian Hospital Ship Portugal.

possession of Verdun still rages.

A counter attack in the region south of Donaumont, on the east bank of the Meuse, was successfully carried out by the French. German trench elements, against which the ettack was directed, were captured. and 200 prisoners, including two offi cers, were taken.

The lull in the German offensive in the Verdun region, which has been interpreted as indicating elaborate preparations for a resumption of the attack, still continues. No attempt has been made at an advance by the German infantry, but the German heavy artillery directed a heavy bomtardment against the Bois d'Avocour! and Hill 304, against which the Germans have directed much of their energy recently

In no previous battles have the lesses been so high as these which bave been estimated in the fighting ground Verdun, These estimates, nowever, can not be regarded as conclusive, for peither Germany nor France has announced its own casualties. The French war office has declared the Germans have lost 200,000 in killed, wounded and captured. The Germans state semi-officially that the French casualties number 150,000 killed and wounded and that 36,000 unwounded French prisoners have been taken, !f correct, nearly 400,000 men have been eliminated as fighting units.

The ground occupiel by the Ger mans after fifty-six days of fighting may be roughly calculated as 100 square miles. They have forced back the French from their outlying post tion to their definite line of resistance along the semi-circle front from the edge of the Argonne eastward across the Meuse and southward into the Woevre. For the most part this main line has withstood the shock of sucressive attacks.

Mr. Cathcart in a statement issued ent civil service law does not meet with the approval of the people. Instead of carrying out the wishes of the people it has had the opposite ef fect. The result has been to create a feeling of dissension and the desire to have the law repealed. It is for this purpose that the Anti-Civil Service association has been formed."

Berlin, April 17.-Announcement is

made by the Turkish government that the Russian hospital ship Portugal sunk in the Black sea last month, was torpedoed by a Turkish submarine. It is claimed that the hospital ship was painted gray, with a small red line and flew the Russian flag. No Red Cross flag was flying and the name of the ship was invisible. The vessel was mistaken for a transport. The Turkish government adds: "Provisions of the convention adopted at The Hague stipulate that hospital ships must be painted white, with a green or red stripe one and one-half meters long, and also must fly the to advices from the Turkish capital, Red Cross flag." The Portugal had is being gradually starved out. 273 persons on board, of whom 115 were drowned.

Train Shaken Up.

Cleveland, April 17 .- Passengers on the Twentieth Century limited, the New York Central's pride, were in danger for the second time in less than three weeks when the train, eastbound from Chicago to New York. crashed into two oil tank cars Sunday night near the drawbridge at the Cuyanoga river, and about a half mile west of the Union station. The entire length of the passenger train was sidewiped and the plates were wrenched off the side of the cars. The train came to a very sudden stop with a jolt. The passengers were thrown about and some of them were more or less cut and bruised.

The crash of the collision was heard for many blocks around the vicinity of the wreck and the report rapidly spread that many people had teen killed or badly injured. A switch man furned in the alarm and a wrecking crew was dispatched to the scene The oil cars had been switched over into a siding and had rolled down a grade to the main or passenger track. There was a bad gash torn the entire length of all the Pullman cars according to the chief train dispatcher.

CONVICTS TO PLANT COTTON.

They Will Cultivate 1,300 Acres of a Prison Farm.

McAlester, Okla.-Thirteen hundred acres of the state prison farm will be planted to cotton this year. All work except the overseeing of the labor will be done by prisoners.

The land on which this cotton will be produced was a few years ago merely rocky and a waste. Hills rock covered and eroded by rains and gullies deeply cut by spring floods surrounded the concrete walls of the penitentiary. Hard labor and careful management have changed the surface to a rolling. well drained seed bed.

Rocks were removed from the surface. Gullies were filled up after drains had been laid. Dams and riprap were emplaced to hold back the fine soil carried down by showers.

In the coming year almost the entire acreage will be devoted to cotton. Of the land still rocky and unimproved hog and cattle pastures have been made. Bermuda grass is spreading. and before many years at the present rate of development enough beef and dairy supplies will be produced to feed the convicts.

Berkeley Springs, W. Va.-Peter V. B. Whisner, who is eighty years old, is the champion hunter of West Virginia. During a period covering fifty years he has killed 330 deer, about 500 coons and 500 turkeys, besides many foxes, squirrels and other game. Of the 330 deer fifty were bucks having horns with from three to five prongs. Two of the deer were white, rare specimens, and one black. The greatest number

he killed in one season was thirty-five. Practically all his hunting was done with a muzzle loading rifle. He said if he had had a rifle like those in use now he could have killed several hundred more deer. He says he has seen fourteen deer in one drove, one of which had white legs, the white extending up to its body.

FLOWERS OF THE PASSION.

Some Legends of Plants Connected With the Story of Easter.

Some of the early Italian painters have in the foreground of their crucifixion scenes the white wood-sorrel, purple stained, which is said to have grown at the foot of the cross and to have been colored from the blood which dropped upon it. The fact, as Ruskin points out, that the leaf of this plant possessed the power of quenching thirst may have been another reason for its introduction into the pictures.

One species of the orchid, which in England is called Gethsemane and whose petals are marked with dark stains; the passion flower, symbolical of the crown, the scourge, the spear and the nails: the arum, tiger lily and

scarret anemohe-an, it was believed. were mute witnesses of the crucifixion, And the white lily, emblem of purity, has always been connected with the stories of the Virgin and of Christ.

In Palestine there grows a creeping plant with long, hard thorns-the Spina christi-which may have furnished material for the crown of thorns placed on the Saviour's head. One of the legends says that the willow was used for this purpose and that in sorrow for its fate fts leaves droop and it weeps.

Hot Cross Buns.

England, as is well known, is famous for its hot cross buns at Easter time. They are baked early in the morning of Good Friday and are eaten for breakfast They are well nigh universal throughout the country, although the cross apon them differs in various localities. In some piaces it seems to be formed by simply drawing a knife across the top of the bun.

Immortality.

It is a thing to be thankful for that twentieth century thinking and twentieth century science are confirming, cumulatively, the dictum of Christian authority that the soul of man is immortal. To assert nowadays that the universe is the outcome of chance is to array oneself against the world's best thought. To affirm that the universe is reasonable means, in the last analysis, "that the world acts as it might be expected to act had it been thought through by mind."-George Wharton Pepper.

SYNOPSIS.

Little Helen Holmes, daughter of Gen-ral Holmes, railroad man, is rescued rom imminent danger on a scenic railfrom initialient danger on a scenic rati-road by George Storm, a newsboy, Grown to young womanhood, Helen saves Storm, now a fireman, her father, and his friends, Amos Rhinelander, financier, and Robert Seagrue, promoter, from a threatened col-lision. Safebreakers employed by Seagrue lision. Safebreakers employed by Seagrue steal General Holmes' survey plans of the cut off line for the Tidewater, fatally wound the general and escape. Her father's estate badly involved by his death, Helen goes to work on the Tidewater. Helen recovers the survey plans from Seagrue, and though they are taken from her, finds an accidentally made proof of the survey blueprint. Storm is employed by Rhinelander. Spike, befriended by Helen, in turn saves her and the right-of-way contracts when Seagrue kidnaps her. Helen and Storm win for Rhinelander a race against Seagrue for right-of-way. Helen, Storm and Rhinelander rescue Spike from Seagrue's men. Spike steals records to protect Rhinelander and Storm and Helen saves Spike from death in the burning of the courthouse.

(Continued from Yesterday's Her-

Salting of the Superstition Mine.

But standing in the room which had just been the scene of his last defeat, Seagrue felt that he could at least enjoy revenge. Helen, Storm and Rhinelander were still facing him, with Spike near, and the sheriff was just leaving the room when Seagrue called to him. As he did so, he drew from his pocket a worn pamphlet and handed it ostentatiously to the sheriff. "There's something of interest to tery

"What do you mean?" returned the official jocularly. He glanced at the pamphlet, saw set forth on the cover a reward of five hundred dollars offered for the apprehension of Spike and laughed: "We see these things every day," said he, handing it back to Seagrue. If I were to chase up all of the pointers I get like that, my salary wouldn't buy gasoline."

You don't have to burn any gaso line to get this money," retorted Seagrue. "Your man is right here."

"Where?" demanded the sheriff skeptically.

Seagrue pointed to Spike. "That

is the man," he said coldly.

Spike decided the game was up. He made a bolt for the door. The sheriff stopped him.

The moment was an unpleasant one. Helen was furious. "Of all the mean things you've ever done," she said to Seagrue, "this is about the meanest. I should think you would want to go and hide yourself," she exclaimed with cutting emphasis, "from the sight of all living men."

Stung, Seagrue retorted in like: "That sounds fine from your lips, Miss Helen Holmes! It's a new role for you to become the champion of prison birds like this fellow." He nodded insolently towards Spike. "Especially,"

"M-m-mister Smith," began Mr. Carleton, "I've a g-g-great s-s-story about the F-fifth Avenue theater f-f-fire."

"Great heavens, man," roared Smith, "don't stop to talk to me about it! Don't you know this is Saturday night and we go to press in fifteen minutes? Get to work and write it, and write as fast as you know how! I want copy, not conversation! Don't you know every minute is precious?"

"Y-v-ves, sir," said the other, with an insistent effort to hold the editor's attention, "but I w-w-want to k-k-know if you w-w-would lend me your s-s-stenographer."-Everybody's.

In time he mastered control of the slow ball, which, batsmen say, is harder to hit than a speeder.

Rucker soon was able to put the ball over the middle or corners of the plate at will. He studied the weak points of the opposing hitters till he knew just what would fool them. Last year Rucker's pitching was confined entirely to slow balls. He did not deliver a fast one all season, and his arm as a result gradually became stronger. The famous southpaw is beginning another campaign with the Brooklyns.
